SUMMARY

Full-stack developer and creative problem-solver with expertise in Java, Spring Boot, React, and AI systems. Developed 5+ production applications including cloud APIs and ML platforms, achieving 15-40% performance gains. Proven ability to enhance user experiences through technical collaboration across Android, cloud architecture, and data pipelines.

TECHNICAL SKILLS

Programming Languages : Java, C++, Python, C#, SQL
Web Development : Hibernate, JPA, REST APIs
Mobile Development : Android SDK (Java, XML), .NET
Database Technologies : MySQL, DBMS
Core CS Concepts : Data Structures & Algorithms, OOP, Computer Networks
Tools & Scripting : Bash Scripting, Git
Other Skills : Python for Data Science

PROJECTS

Hostel Menu Dashboard | React, Supabase, Python Aug 2025
– Built React dashboard for 500+ students with real-time menu updates and hostel-specific views
– Automated data pipeline with Python scripts and secured Supabase database with RLS policies

ScrapAI | Next.js, TypeScript, Web3Auth, AI Jul 2025
– AI waste detection platform with 95% accuracy; 20% faster loads via Next.js optimization
– Web3Auth integration reduced login failures by 40% and boosted retention

Multi-Cloud Storage API | Angular, Spring Boot, SQL, Java Sep 2024
– Built RESTful API for cross-platform file sync (40% faster uploads) with Angular UI & Spring Boot backend (30% faster queries)
– Implemented RBAC & metadata management for 5K+ file transactions under Infosys mentorship

Game Development | C++, SFML 2023-2025
– Built Timber Man and Pong with event-driven C++/SFML architecture
– Implemented collision detection and physics systems supporting 60+ FPS rendering

Data Science Projects | Python, TensorFlow, Pandas 2023-2025
– Developed Nifty Predictor achieving 85% accuracy with LSTM models
– Created DES Image Encryption tool with 256-bit security

EXPERIENCE

Mobogage Private Limited May 2024 – July 2024
Android Developer (Intern) Jaipur, Rajasthan
– Developed key features in Java/Android, improving app functionality by 25%
– Optimized API integration, reducing latency by 15% through code debugging
– Enhanced app performance by 20% via memory leak fixes and UI rendering improvements
